Packaging:

Item no.	Colour	Size
63871	Natural	75 ml tube
63821		250 g can
63873	Oak	75 ml tube
63823		250 g can
63875	Teak	75 ml tube

Direktions for use:

- Preparation:** *The surfaces must be clean, dry and degreased.*
- Application:** *Wood Filler 638 is applied in layers up to 1-2 mm.
When a layer has dried, a new can be applied.*
- The final layer must be applied a little above the surface level. After curing the wood filler can be sanded slightly.*
- When using the tube packaging with the dosing tip, the dosing tip must be cut off approx. halfway down so that the wood filler can easily pass through the tip, Notice – if the wood filler is not used up at once, the dosing tip must be removed and cleaned for later use, the tube is closed with the screw cap.*
- Drying time:** *The drying time of the filler is depending on the temperature and the thickness of the of the layer, it's expected that the filler is dry after 1-2 hours when applied 1 mm.*
- Treatment:** *After curing it is able to fix crews, sand and lacquer etc.*
- Because of the differences in paint and lacquer composition, we always recommend to carry out compatibility tests.*
- Cleaning:** *Tools can be cleaned with Thinner 954 or acetone before curing of the filler. Cured filler can only be removed mechanically.*
